blue-greens are believed to have mood-lifting effects

Think Big

It's easy to assume one should enhance a small space with small art-objects. Yet one prominent piece such as a statement artwork will make the space feel uncluttered and open.

artwork for children

never ending / repeatable without a visible transition

Nature-inspired Images
Bring the natural landscape inside, via art. This will convey to the viewer's eye expanse and depth.

Artistic treatment of a ceiling creates depth: Color, shapes – such as these clouds – and fun fixtures draw the eye upward, creating an illusion of height. Shades of blue and the illusion of sky create a mood enhancing effect.

goodmoodframes

I achieve great impact by combining theme and light in an approach I specifically developed. goodmoodframes are wall-sized, lit photographs, the themes of which create the perception of expansive spaces and a positive and energized frame of mind. The good mood is caused by association. Our unconscious mind receives optical impressions and creates emotions based on its visual environment. The image of a large goodmoodframe shapes the feel of a space profoundly: the bright and inviting energy of the image causes a positive mind-shift in the viewer.

workout in front of goodmoodframes

workout in front of goodmoodframes

Large-format images can greatly shape the atmosphere of a space. Such designs can have a cooling or warming effect. The right image creates a feel of a wide expanse, thus offering a simple solution for visually opening up small rooms, or enhancing spaces lacking attractive views.

My main work area is business to business and my work focuses on artistic and creative solutions for wall designs. I create large-format photographic imagery, which achieve a room-enhancing and space-expanding effect. With some series I specifically intend to provide calming, relaxing, invigorating and refreshing environments. These works have been successfully installed in wellness resorts, hotels, medical facilities and hospitals, as well as in offices.

RICA BELNA

Rica Belna, Austrian, born 1973, has called Berlin, Germany her home since 1993. At the age of 16 Rica started to work with photography, gaining a first experience with professional cameras through her membership in a photo-club. This initial interest and involvement in photography as a hobby, originally mostly black and white as well as portraits, led to Rica's full-time artistic work starting in 2004. In 2006 Rica switched to digital photography, which opened up an entirely new venue of artistic and creative work. She now uses DSLR and medium format cameras.

The opportunity to aesthetically affect and control the quality of her work right away is very important to Rica.

It provides great possibilities and capabilities in her creation of large format artworks. In addition Rica developed original photo-techniques, which produce the unique style seen in her photo-design works.

Latest developments in digital cameras, image editing and printing processes directly support the top quality requirements Rica puts in her art, as well as her preferences for working on large size imagery in her assignments. She says: "My creative potential grows with the possibilities that comemy way". Starting in 2008, Rica has been developing unique photographic designs for large-format printing. These pieces have been up to 25 meters long (approx. 75 feet). Many of these artworks have been installed in 5-star hotels, office buildings as well as wellness-resorts.
